📍 Rabat, Morocco

PROFILE

- Engineering student at INPT (National Institute of Posts and Telecommunications), specialising in **Ubiquitous & Distributed Systems, Cloud & IoT**.
- Passionate about Cloud, DevOps, distributed computing, and applied research.
- Seeking a **PFE internship (end-of-studies)** to apply my skills and deepen my knowledge.

EXPERIENCE

Full-Stack & DevOps Intern — Synthèse Conseil 📅 Summer 2026

AI-Powered Financial Forecasting Platform

- Contributed to the development of an AI-powered, data-driven financial forecasting platform that integrates with heterogeneous ERP systems.
- Developed RESTful APIs with ASP.NET Core and built Excel/CSV import and validation pipelines to bring clean financial data into the platform.
- Architected a multi-tenant database with Entity Framework Core, normalizing accounting data from multiple clients into a standardized financial model.
- Evaluated and integrated ML.NET forecasting models, translating their output into interactive dashboards for financial data visualization and analysis.

Stack : ASP.NET Core, C#, Entity Framework, PostgreSQL, React, Docker, ML.NET

Cloud & DevOps Intern — S B SOLUTIONS MA 📅 Summer 2026

Production Platform Deployment

- Managed VPS provisioning, Docker-based deployments, and configuration management for applications running in production.
- Established logging and monitoring pipelines and standardized deployment procedures, analyzing system metrics to strengthen reliability across the software delivery lifecycle.

Stack : DevOps, CI/CD, Docker, VPS, Nginx, Linux, Git

PROJECTS

Academic Project — OpenStack Private Cloud Summer 2025 | INPT

OpenStack, Kolla-Ansible, Linux, Docker

- Deployed an IaaS private cloud from scratch with OpenStack Epoxy, first on a multi-node architecture separating Controller, Compute, and Storage roles.
- Rebuilt the deployment on a single-node setup using Kolla-Ansible, then configured and validated the core OpenStack services.
- Created and launched virtual instances on the resulting infrastructure to confirm the platform was fully operational.

Student Success Prediction — Data Mining

ML/DL/AI

Python, scikit-learn, Pandas

- Built a full data-mining pipeline to predict academic success, covering preprocessing, feature engineering, and model training.
- Benchmarked Random Forest against Gradient Boosting classifiers and selected the best-performing model, reaching an AUC of 0.963.

Microservices & CI/CD Pipeline on AWS

AWS / DevOps / Cloud

Node.js, Docker, AWS, CI/CD

- Migrated a monolithic Node.js application into two containerised microservices, deployed on AWS.
- Built a fully automated CI/CD pipeline enabling zero-downtime blue/green deployments.

AI Counsult — Intelligent Hybrid Chatbot

Distributed Systems / AI

Ollama, Android, REST API

- Built a hybrid chatbot that intelligently routes each query to the most suitable local LLM via Ollama, prioritizing autonomy, privacy, and extensibility.
- Paired the chatbot with an Android app that lets users manually select which model handles their query.

EDUCATION

Engineering Degree — Ubiquitous & Distributed Systems, Cloud & IoT

National Institute of Posts and

Telecommunications (INPT)

📅 Sept. 2024 – Present 📍 Rabat

Preparatory Classes — TSI

CPGE Safi

📅 Sept. 2022 – May 2024 📍 Safi

Baccalauréat — Sciences & Technologies

Lycée Technique Qualifiant

📅 Jun. 2022 📍 Ben Guerir

CERTIFICATIONS

Oracle Cloud Infrastructure 2025

Certified Foundations Associate

Cloud, Compute, Networking, Storage, IAM

AWS Academy Graduate

Cloud Architecting

AWS Best Practices, Building Infrastructure

AWS Academy Graduate

Microservices and CI/CD Pipeline Builder

AWS CodePipeline, CD, CI, Microservices

TECHNICAL SKILLS

Languages: Python, Java, C#, C, C++,

JavaScript, TypeScript, SQL, Bash

Web & Backend: NestJS, FastAPI, Node.js,

ASP.NET Core, React, REST API

Cloud & DevOps: OpenStack, OCI, Azure, AWS,

Docker, Kubernetes, Jenkins,

Kolla-Ansible, GitLab CI, GitHub Actions

Virtualisation & Infra: VMware ESXi, Hyper-V, VirtualBox,

KVM, High Availability, Ansible

IoT & Embedded: ESP32, MQTT, CoAP,

LoRaWAN, Arduino, OpenCV, YOLO

Systems & Networks: Linux, TCP/IP, DNS,

SSH, Nginx, Networking, Sysadmin

LANGUAGES

Arabic: Native

French: Fluent

English: Professional

Spanish: Beginner
