🔧 Experience

Private Cloud Infrastructure — OpenStack

Jul. – Sep. 2025 | INPT Capstone

Design and deployment of a complete **multi-node IaaS private cloud** with OpenStack Epoxy, covering compute, networking, storage, identity, and dashboard services.

- Multi-node and single-node deployment via **Kolla-Ansible** on Ubuntu Server; configured **Keystone, Nova, Neutron, Cinder, Glance** and **Horizon**.
- Created and managed virtual machine instances across provider and tenant networks.

OpenStack (Epoxy) KVM Kolla-Ansible Docker Ubuntu Server MariaDB RabbitMQ

🔗 Academic & Technical Projects

Microservices & CI/CD Pipeline on AWS

AWS ECS Fargate | CodePipeline | Blue/Green Deploy

End-to-end migration of a monolithic Node.js application into **two independent containerised microservices** on AWS, with a fully automated CI/CD pipeline and blue/green deployment strategy.

- Split the monolith into **customer** (read-only) and **employee** (read-write) services; path-based routing via an **Application Load Balancer** (/admin/* rules); IP-restricted listener rules to limit employee access.
- Docker images stored in private **Amazon ECR** and deployed on a **serverless ECS Fargate** cluster; two independent **CodePipeline** pipelines (CodeCommit + ECR trigger) drive **CodeDeploy** zero-downtime deployments; scaled customer service to 3 tasks independently.

Node.js Docker ECS Fargate ECR CodePipeline CodeDeploy CodeCommit ALB RDS (MySQL) CloudWatch IAM

MyHeart — Hospital Management System

📄 github.com/YNJJo5

Full hospital management platform built on **8 independent microservices** exposed through a **JWT-secured API Gateway**; manages patients, doctors, appointments, and medical records.

Node.js FastAPI React.js PostgreSQL MongoDB Docker Compose Nginx

AI Consult — Hybrid Multi-Agent Chatbot

📄 github.com/YNJJo5

Orchestration of **Gemini, GPT-4o, and DeepSeek** via an **intelligent request-routing system**; real-time asynchronous backend over WebSockets.

Python FastAPI NestJS MongoDB WebSockets Docker

GreenTech SmartBin — IoT Waste Management

IoT solution for smart waste collection: **ESP32** sensors broadcasting real-time fill-level data, complemented by an automatic waste classification module using **YOLO** computer vision.

ESP32 / C++ Python FastAPI OpenCV YOLO LoRaWAN Docker

⚙️ Technical Skills

🔗 Languages

C, C++, Python
JavaScript, Java

🔧 IoT & Embedded

Arduino, LoRaWAN
MQTT, CoAP, Sensors
OpenCV, YOLO

🌐 Web & Backend

Node.js, React
FastAPI, REST API
Microservices, SOA

📊 Data & ML

Pandas, Matplotlib
Scikit-Learn
ML Pipelines

☁️ Cloud & DevOps

AWS, Azure, OCI, OpenStack
Docker, Kubernetes
CI/CD, GitLab CI, GitHub Actions
🔧 System Administration
Linux / Ubuntu Server
Shell & Bash Scripting
SSH, Git, GitHub

🏢 Virtualisation & Infra

VMware, ESXi
Hyper-V, KVM, VirtualBox
Kolla-Ansible, Ansible
🌐 Networking & Security
TCP/IP, DNS
WebSockets
Nginx

🌟 Certifications

AWS Academy Graduate — Cloud Architecting

Amazon Web Services (AWS)

Architecting Solutions on AWS, Building Infrastructure on AWS

Oracle Cloud Infrastructure 2025 Foundations Associate

Oracle

Cloud Foundations, Compute, Networking, Storage, IAM
